

VERSAILLES - WATER AND SEWER REGULATIONS

§ 50.28 OTHER RATES AUTHORIZED.

(A) Notwithstanding any other provisions of this subchapter, the City Council may establish wholesale rates for the supply of water to duly constituted water districts, and may enter into written agreements with one or more water districts for the supply of water at agreed rates. These rates shall be sufficient to reimburse the city for all costs and expenses, including reasonable contributions to capital costs.

(B) The City Council may also enter into written agreements with responsible developers of subdivisions outside of the city limits for the reimbursement of those developers for advances made by the developers in the construction of additions to the water portion of the combined water and sewer system.

(1) Such additions or extensions shall thereupon be made a part of the city's combined water and sewer system.

(2) The city shall receive, for deposit in the water and sewer revenue fund, from each customer in the subdivision to whom water is supplied, an amount equal to that fixed by the rates established by this subchapter.

(3) Nothing herein contained shall be construed to prohibit the city, under the terms of such an agreement, from making payments from the depreciation fund to the aforesaid developers to pay the costs of such additions, extensions, or improvements, or from determining the amount of such payments or the rate of payment on the basis of income received from connections made or the number of the connections.
